TOWN OF NORTH HAMPTON'S
COMMUNITY CHOICE AGGREGATION PROGRAM

You are receiving this postcard because you are currently enrolled in North Hampton's Community Choice Aggregation Program. Since its launch in April 2026, the Town's Program has provided participating residents and businesses with an electricity supply rate **lower than** rates available from Eversource.

Electricity market prices have remained elevated over the last several months and the Town has been unable to secure a new supply agreement at a price level that meets the Town's objectives of providing residents and businesses with a program rate favorable to utility default service.

Consequently, **the town is suspending its Program at the end of its current electric supply contract in November 2026.** The Town will continue to monitor market prices and look for an opportunity to resume service again in the future.

No action is required by individual consumers.

There will be no interruption in electricity service to your home or business.

All accounts currently enrolled in the Program will be switched to the Eversource electric supply rate as of the November meter reads. This change will be noted on the Eversource bill that you receive in November and you will see the change in supply service on your Eversource bill in December. The current Eversource electric supply rate of $0.14009/kWh will remain in effect until January 31, 2027. The Eversource rate starting February 1 will not be set until mid-December.

For more information about North Hampton's Program please visit www.colonialpowergroupnh.com/north-hampton/ or call Colonial Power Group, the Town's aggregation consultant, toll-free at (866) 485-5858 ext. 1.
